# Why NÜVIVE BODY for men?

---

When properly supported, our brain and body will maintain a normal resilience and balance during stress, helping us to remain energized, focused and clear headed. However, when increasingly overwhelmed by stress, our bodies and minds seldom get a chance to restore our natural equilibrium. The result is that an estimated 75%–90% of visits to primary care physicians are now related to the effects of stress.

---

This epidemic of stress reaches virtually everyone today and even more alarming is a recently published study linking stress with shorter telomeres (the caps on the ends of chromosomes), which is associated with accelerated aging! It turns out, stress disrupts multiple biochemical pathways, including cortisol production, the hypothalamus-pituitary- adrenal (HPA) axis, as well as neurotransmitter production in the brain. A pre-clinical study has shown that stress also inhibits neural plasticity (aka., the growth of new connections between neurons in the brain)!

Fortunately, NÜVIVE® BODY is a state-of-the-art formulation of natural botanical ingredients shown to promote a healthy response to everyday stress, over-work and fatigue.† NÜVIVE® BODY combines four known stress-modulating botanical ingredients and extracts—Phosphatidylserine, Ashwagandha, Cordyceps, and Pomegranate —each scientifically validated to support a healthy response to stress.†
