

Disclaimer

The use of immune cells is determined by the treating physician and manufacturer of the final products and is influenced by many factors, including the patient's medical condition, the characteristics of the sample, and whether the immune cells should be further modified or expanded. Immune cells have established uses in certain blood cancer treatments; however, its use in solid cancer is still being researched. There is no guarantee that treatments being studied in the laboratory, clinical trials, or other experimental treatments will be available in the future.

Genetic LifeSpan, Inc. cryopreserves immune cells that have been collected from an individual for potential future cellular therapy use. Genetic LifeSpan, Inc. does not provide medical advice, treatment or care. The use of cryopreserved cells for future immunotherapies is not guaranteed. Much is yet unknown about the future of immunotherapy and the immune cells that have been cryopreserved. The use of cryopreserved cells by commercial manufacturers for CAR-T therapy production is not currently approved by the FDA. There is active research ongoing, however, there is no guarantee that your cryopreserved cells will have a future therapeutic use. Only your health care professional can help you evaluate whether your cells might be used and if so, how they might be used. Genetic LifeSpan, Inc. and its shareholders, directors, officers, agents, employees, affiliates, network of providers and provider facilities, will not be liable to you or any other party for claims relating to sample collection or if your cells cannot be used, or if any harm, injury, damage or loss results from the use of your cells.

*Price Match is based on the same technology and service scope.
